

Breaking News....First SHE Technician completes EPA

“ I would recommend completing the SHE to anyone who learns best through practical learning. Being able to complete my learning through working allowed me to improve my knowledge, skills and behaviours around health and safety. I can't believe I'm the first SHE learner to complete in the country, I hope there's many more to come!”

- Anna Gaughey

A Penshaw View employee becomes the very first apprentice to complete end point assessment whilst studying the Safety, Health and Environment Technician Apprenticeship. We are extremely proud of Anna who has helped us demonstrate why our quality training provision, leads the marketplace for this qualification. End point assessment completed by Highfield who we look forward to working with, as we make our way through the progression of our other apprentices across England. Our in-learning SHE Technician apprentices are in excess of 100, working with organisations such as Amazon. Exciting times ahead for the health and safety industry.
